

Talissa Dreossi

PhD in *Computer Science and Artificial Intelligence*

PhD in Computer Science and AI with specialized research expertise in explainable machine learning and logic programming. Experienced in applied AI models, with international research collaborations and publications in leading conferences. My work combines rigorous, theory-driven research with practical engineering skills, with a strong commitment to developing clear, interpretable, and reliable AI solutions. A reliable and well-organized professional, with strong problem-solving abilities, creativity, adaptability, and a natural inclination for teamwork.

EXPERIENCE

2025 - CURRENT

Teacher

ISIS Paolino d'Aquileia • Convitto Nazionale Paolo Diacono • IT Zanon

Computer Science high school teacher

2024

PhD visiting student

Imperial College London

PhD visiting student

Host Professor: Prof. Alessandra Russo

2019 - 2022

AI Full Stack Junior Developer

Thinking Flows

- Development and optimisation of neural networks using TensorFlow
- Implementation of modern NLP techniques
- Design and deployment of production-grade chatbots with RASA, integrating business logic
- Data preparation and project structuring, with experience in scalable, containerised deployments using Kubernetes

2022

Teacher

Liceo Scientifico Marinelli

Substitute maths teacher

2018 - 2020

Tutor

Università degli Studi di Udine

Tutoring activity providing academic support for university students in the Department of Computer Science.

2014

Intern - Web Valley

Fondazione Bruno Kessler - FBK

Designed an open-source web platform to study childhood microbiota dysbiosis.

EDUCATION

2022 - 2025

Università degli Studi di Udine

PhD in Computer Science and Artificial Intelligence

Supervisor: Prof. Agostino Dovier

Thesis: Bridging Logic Programming and Deep Learning for Explainability through ILP

2018 - 2020

Università degli Studi di Udine

Master in Computer Science

Grade: 104/110

Thesis: Generative Adversarial Networks for Jewelry Images Generation and 3D Model Production

2015 - 2018

Università degli Studi di Udine

Bachelor in Computer Science

Grade: 104/110

Thesis: Applicazione delle Reti Neurali Ricorrenti al Riconoscimento di Attività Fisiche

PROGRAMMING LANGUAGES AND OTHER TECHNOLOGIES

- ASP
- Azure
- C, C++
- Docker
- Excel
- Haskell
- ILASP and FastLAS
- Java
- Javascript
- Kubernetes
- Latex
- Minizinc
- MySQL
- Nodejs
- Python
- RASA
- Scheme

LANGUAGE

ITALIAN

Mother tongue

ENGLISH

Advanced

2010 - 2015

**Liceo Scienze Applicate -
A. Malignani, Udine**

Diploma

Grade : 98/100

Extracurricularly:

- Maths Olympics, nationals (2012)
- European Union Science Olympiad, bronze medal (2013)

RESEARCH GROUPS AND ASSOCIATIONS

2022 - 2026

GULP

Logic Programming Researchers and Users Group

<https://www.programmazione logica.it/>

2022 - 2026

INdAM - GNCS

National Group for Scientific Computing

<https://www.altamatematica.it/gncs/>

2022 - 2026

CLP Lab

Constraint and Logic Programming Lab of the University of Udine, DMIF

<https://clp.dimi.uniud.it/>
